Memorandum

To: Chief Scientist, Science Center
From: ^{ACTING} Regional Director, Western Region
Subject: Geographic name proposals, Docket 209, Saguaro National Monument, Arizona and Yosemite National Park, California

This is in response to Acting Chief Scientist Sigafoo's subject memorandum of April 19.

Tanque Verde Ridge and Rincon Mountains are proposals initiated by Superintendent Lukens, Saguaro National Monument, to clarify the application of these two names, as indicated in the enclosed copy of Mr. Lukens' Form 9-1343. We, as well as the General Superintendent, Southern Arizona Group, concur in Superintendent Lukens' recommendations. Also, it should be noted that Vern Zarlingo, local representative of the U. S. Forest Service, supports this clarification in the application of these names.

Mount Bruce was initiated by Superintendent Arnberger, Yosemite National Park, as indicated in the copy of his Form 9-1344. We, as well as the California Advisory Committee on Geographic Names, concur in the recommended name. However, discussions at the April 27 meeting of the California Advisory Committee indicated that incorrect coordinates were given on Form 9-1344, as well as in Docket 209. The corrected coordinates were determined to be: 37° 36' 01" North; 119° 29' 32" West.
